Richie Varghese

Tech Lead

+91-8281756733 ric-v@outlook.com

Seasoned principal software engineer excelling in crafting highly scalable systems and optimizing critical systems performance. Currently leading a 3-member team, delegating daily tasks, and collaborating closely to deliver top-quality software that aligns with the company's goals.

Proficient in Golang/Go, Rust, React.js framework, Shell scripting, DBMS, and a variety of modern frameworks. Driven and ambitious about broadening my expertise in systems programming, system design, and architecture.

EXPERIENCE

Worklife Tech. (Previously part of G&S Consulting Pvt. Ltd.), Bengauluru, India -

Domain: ***Pharma-Tech*** | **June '21 - Present**

Engineer - Software Development - June 2021 - Sept 2021
Senior Engineer - Software Development - Oct 2021 - Mar 2023
Principal Engineer - Software Development - April 2023 - Mar 2024
Tech Lead - Software Development - **April 2024 - PRESENT**

- Led a team of three in the Pharma-Tech domain, ensuring deliverables met live system standards.
- Developed and maintained microservices to process pharmacy insurance claims in real-time for XIL Health's PBM program in the U.S. called VisoryHealth.
- Optimized core logic to process requests with <100ms response time despite high-frequency requests.
- Improved efficiency by 60% via product dockerization, telemetry, real-time monitoring, and unit testing on Microsoft Azure.
- Re-engineered Postgres functions, achieving a 50-500ms performance gain per query.
- Designed and collaborated on a proof of concept for a groundbreaking U.S. healthcare product, improving health plan provider ratings.

Algomox Pvt. Ltd., Bengaluru, India-

Domain: ***AIOps & MLOps*** | ***June '18 - May '21***

Software Engineer L1 - JUNE 2018 - MAY 2019
Software Engineer L2 - **JUNE 2019 - MAY 2021**

- Worked as part of the initial employee team at a startup, where I contributed to the development of two major platforms: AIOps and MLOps.
- Held multiple roles, including Senior Golang Developer, System Admin, and SCM.

- Developed and deployed microservice-based Golang applications, focusing on system-level improvements for data collection. Tested for over 10K metrics/second.
- Contributed to the system design and optimization of telemetry data collection engines.
- Developed a high-volume DB insert function using JAVA ASM for the Cassandra NoSQL DB, tested for thousands of records per second. This improved insert speed by 10x and eliminated slow query build-up in Cassandra after frequent high-volume inserts.
- Conducted technical feature demos for clients such as Cisco and Mindtree.

SKILLS

- **Programming Languages** - Golang, Rust (comfortable), Python (comfortable), JavaScript/TypeScript, Bash, plg/pgSQL, CSS
- **Frameworks** - NextJS, React, Flask, Material-UI, TailwindCSS, gRPC, REST APIs, flutter
- **Libraries/Tools** - gin, gorm, redux, Prometheus/Grafana
- **System Design / Architecture:** Designed microservices in Golang with REST APIs/procedural programming using system-first patterns for optimization in Factory design pattern.
- **Leadership** - Takes up ownership and accountability over modules deputized or consulted with.
- **Mentorship:** Mentored graduate students and junior developers in software design principles and programming language syntax.

EDUCATION

Scaler Neovarsity (Woolf University, Malta) - *Master's Degree in Computer Science*

MARCH 2022 - DECEMBER 2024

- Advanced DSA, HLD, LLD, Data Engineering.

College of Engineering, Kidangoor, Kerala, India - *B.Tech I.T*

AUGUST 2014 - MAY 2018

- Presided over SWIFT, the student association for I.T Dept. from 2017-'18 academic year.
- Organized the first-ever inter-college tech fest under the Department of Information Technology in C.E.K - Innovate '18 with the help of volunteers from SWIFT - https://fb.com/innovatee18
- Final year project - Hazel a linux chatbot was selected by KSCSTE's Innovate programme for a grand of Rs. 10,000/- and participated in TEKON 2018

Don Bosco H.S.S, Puthuppally, Kerala, India - *Pre-degree (12th grade)*

AUGUST 2012 - MAY 2014 - Kerala State Syllabus - Score: 91%

Don Bosco H.S.S, Puthuppally, Kerala, India - *10th grade*

AUGUST 2011 - MAY 2012 - Kerala State Syllabus - Score: 88%

PERSONAL PROJECTS

- **And the time is...** - https://timeis.astrx.dev/ **-** **https://github.com/dev-asterix/and-the-time-is**

  A NextJS, Redux, and TailwindCSS simple web-app, hosted on Vercel, that provides users with an intuitive UI to quickly find the current time across multiple time zones. It also enables users to compare the time in a particular time zone to their current time zone, both in the past and the future.

  Hosted on Vercel for public access.

- **Glog** - **https://pkg.go.dev/github.com/ric-v/glog**

  Glog is a concurrent, easy-to-implement file-based logger for Golang applications. It utilizes channel-based data streaming to ensure thread-safe and zero-overhead logging with zero external dependencies.

- **Divulge : Key-value DB UI** - **https://github.com/ric-v/divulge-keyvalue-db-ui**

  An intuitive UI, written in Go, for managing Key-value pair DBs like BuntDB/Bolt DB.
